Getting to know the Crestron Control Panel...

This devise allows you to control the projectors, sound, and document camera

- Shuts down the system
- Controls Projector 1 located on the left
- Controls Display located on the East wall
- Admin use only
- Increases the volume
- Decreases the volume
- Mutes the sound

Provided by Academic Center for Technology
How to turn on the projector...

The following steps will turn on the projector and bring the projector screen down

1. To turn on the projectors, press the button labeled “PROJ” on the Crestron Control Panel this will turn on the projector and lower the screen.

2. Next on the input menu choose the desired input (Desktop, Doc Cam, Laptop, etc..) you would like to project.

Provided by Academic Center for Technology
How to connect a laptop to the projector...

*When using a Macbook, an adapter will be needed; contact ACT for assistance*

1. Follow the instructions on how to turn on the projectors and choose the input **Laptop**.

This classroom is equipped with a VGA input.
How to turn on the LCD Display...

The LCD Display will automatically turn on and is located on the East wall

1. To turn on the projectors press the button labeled “DISPLAY” on the Crestron Control Panel, this will also turn on the LCD Display

2. Next on the input menu choose the desired input (Desktop, Doc Cam, Laptop, etc..) you would like to project
How to set-up the sound...

Make sure the sound on the desktop computer is on and set at a reasonable level

**NOTE:** The sound automatically turns on when the projectors are tuned on

Adjusting the volume:
- VOL^: increases the volume
- VOL v : decreases the volume

The blue color indicates the volume level
Using the Lavalier Microphone...

If your presentation is being recorded, the lavalier microphone needs to be used to amplify your voice. Attach the microphone to the collar of your shirt and place the receiver in your pocket.

Turning on the microphone:
1. Push the two clutches to open the battery compartment cover
2. Press the ON/OFF button
3. The display will light up with the LCD lights displaying the “Frequency/Name” and battery level
4. Make sure the microphone is not on mute. The mute switch is located on the top of the receiver.

When finished, push and hold the power button until the LCD display powers off.

Getting to know the Document Camera...
Turning on the Document Camera...

These steps are followed after selecting “Doc Cam” on the Crestron Control Panel

1. Start by unlocking the support arm and pulling it up
2. Rotate the lens so it is facing toward the document plate
3. Remove the lens cap

Turn on the document camera on by pressing the power button. Allow the document camera to warm up for minute. It should now be projecting on the screens.

Provided by Academic Center for Technology
